IVAM joint booth "Micro Nanotech"

Dear visitor,

At MD&M West 2018, IVAM Microtechnology Network brings together innovations in key technologies such as micro- and nanotechnology, photonics and advanced materials.

The special area "Micro Nanotech" will function as the central hub for end users of Micro- and Nanotechnology and put the latest trends in diverse high-tech fields on display.

The exhibitors of the IVAM joint booth will present miniaturized components, high-tech electronics, innovative laser processes, functional coatings, smart sensors as well as high-precision structuring, measuring and screening processes that constantly make medical technology products safer, cheaper and more reliable.

Key enabling technologies such as micro and nanotechnology are already firmly established in the medical market. The technologies are essential for the production of smart miniaturized medical devices.

This flyer will provide an overview of the companies and institutes which will be exhibiting at the special area "Micro Nanotech".

Take the opportunity to get a global overview of the diverse application areas of miniaturized high-tech for medical devices and to find new partners and customers!

We are looking forward to meeting you at MD&M West 2018.
