

Project Manager

Ginolis is currently looking for a full-time Project Manager to join the Ginolis team in Oulunsalo. As a Project Manager, your main responsibility is to plan and manage our Customer and Internal projects. Key areas of the work are to

- define and plan projects with our Customers and Ginolis internal departments
- ensure valid information is available for all the parties so that day-to-day activities and project objectives are met

In this position, you lead Customer and Internal projects. As a Project Manager, you monitor on-time delivery at project milestones, quality, and cost. Also, you are responsible for customer communication, project kick-off meetings, negotiations and project approval processes. You work in close contact with Ginolis Sales, Engineering and Production departments. Work experience from medical automation and validation processes is an advantage.

To be successful in this position, we expect you to have the following background and skills:

- Bachelor or M.Sc. in technical engineering or equivalent
- Over three (3) years' experience in project work in automation engineering industry or equivalent.
- Leadership capability (leading a project and a team from a strategic perspective together with our production management)
- Self-motivated, proactive and result oriented team player
- Systematic and thorough working methods
- Excellent communication and interpersonal skills with internal team as well as with customers and vendors
- Fluent written and spoken English
- Ability to travel occasionally domestically and internationally

For further information, please contact pekka.ponkanen@ginolis.com.

Please submit your application, CV with references and salary expectations to recruitment@ginolis.com by 31.1.2020.

The position is filled as soon as a suitable applicant is found.

About Ginolis

Ginolis specialises in high-quality automation, liquid dispensing and quality control solutions for the production and processing of medical devices and diagnostics. From standard products to fully customised systems, Ginolis offers an extensive range of solutions based on its modular automation platforms. The company boasts patents in dispensing, microfabrication and precision robotics.

Established in 2010, Ginolis is headquartered in Oulu, Finland with sites in San Diego, USA; Uppsala, Sweden and Suzhou, China. The company is privileged to work in co-operation with many of the world's leading diagnostic companies.
